

2.3 LP - ENVIRONMENTAL LEADERSHIP POLICY STATEMENT

Arteak is committed to protecting the environment and minimising the environmental impact of its activities while delivering safe, compliant, and effective services for its clients.

Our work is undertaken in complex industrial environments where environmental harm can have serious legal, reputational, and operational consequences. Environmental responsibility is therefore integral to how we plan and execute work.

Arteak is committed to:

- Complying with applicable environmental laws, regulations, and client requirements
- Preventing pollution and minimising environmental impact arising from our activities
- Using resources responsibly and efficiently
- Identifying and managing environmental aspects and risks associated with our work
- Supporting clients in meeting their environmental obligations through disciplined oversight and reporting
- Maintaining an effective Integrated Management System aligned with recognised international environmental standards
- Continual improvement of environmental performance

Arteak personnel do not authorise environmental risk on behalf of clients. Where non-compliance or environmental concerns are identified, these must be reported and escalated in accordance with Arteak requirements.

This policy applies to all employees, self-employed contractors, subcontractors, and any individual performing services for Arteak or on behalf of its clients.

Compliance with this policy is a condition of engagement.

This policy is supported by Arteak's governance policies, frameworks, procedures, and operational controls, which together form Arteak's management system and define how requirements are implemented, monitored, and assured in practice.
